

special products > **PILE DRIVER FOR EXCAVATOR, BACKHOE AND CRANE**

The excavator/backhoe pile driver was designed for customers who already have an excavator/backhoe and need to carry out less demanding driving operations (maintenance, etc.).

This solution enables off-road interventions even in difficult conditions using the stability and traction of a tracked excavator/backhoe.

This pile driver provides excellent performance at an affordable price.

Crane-mounted pile drivers are special machines designed for customers who have trucks equipped with large cranes and want to use them in combination with the pile driver. This combination enables the pile driver to be mounted as easily as if it were mounted on a truck.

The assembly of the equipment on self mobile vehicles requires special connection systems which are excluded from the total weight of the machine.

TECHNICAL DATA

MODELS:		600	800	1000
HAMMER DRIVING POWER	JOULE	590	950	1200
HAMMER BLOWS PER MINUTE	N°	650/1000	620/1500	570/1180
MAX. OPERATING PRESSURE	MPA	15	15	18
OIL FLOW	DM ³ /MIN	45/85	60/90	70/100
MAX. PILE DIAMETER	MM	180	180	200
TOTAL WEIGHT	KG	970	1120	1270
